

Health, Safety, Environmental & Sustainability Values

aragon

Our Commitment to Responsible Operations

We are committed to ensuring **SAFE** and **RESPONSIBLE** operations every day on all of our projects.

This commitment runs throughout Aragon with the goal being that everyone in our organisation is responsible to look after themselves, each other and consider their actions, consequences and their impacts.

ONLY THE MOST STRINGENT TARGETS ARE ACCEPTABLE

- Everyone comes home safely after a day of work
- A healthy and safe working environment for everyone
- Minimised impact to the environment
- Safe Design = Safe Operations
- Best practice environmental design from day 1 on all projects

How do we achieve our goals?

BY FOCUSING ON THE RIGHT WORKING CULTURE

- Supportive and open
- Lead by example
- Uncompromising commitment to quality, health, safety and the environment
- Pride in a job well done
- Encouraging our partners and clients to achieve the same goals and fostering the same approach.

BY CHOOSING THE RESPONSIBLE OPTION

Aragon's headquarters in Bergen, Norway are one of Norway's most energy efficient buildings with 80% reduced energy use compared to TEK 10 standards. Furthermore they are located next to the local tram system running on clean electric power. This is as part of our commitment to low impact operations every day.

Responsible and sustainable operations
across borders, languages & cultures.
